Dutch Search Year Visa (Zoekjaar) – No Sponsorship Required

User-centric Fullstack Engineer (Frontend Focus) bridging the gap between sophisticated design and scalable technical implementation. Specialized in HTML, CSS, TypeScript and Next.js, with a background in UI/UX Design.

SKILLS

- **Frontend:** TypeScript, JavaScript, React, Next.js, HTML, CSS, TailwindCSS, Shaden UI.
- **Technical Practices:** Unit Testing, Git/GitHub Workflow, Performance Optimization.
- **Backend:** Node.js, Prisma ORM, SQL, RESTful APIs, Authentication.
- **Design:** Figma, UI/UX Research, Information Architecture, Wireframing, User Flow Diagrams, Prototyping, Responsive Design, Google UX certification(In Progress,5/7)
- **Languages:** English (Professional | 3-year English study and work experience), Dutch (beginner), Chinese (Native).

WORKING EXPERIENCES

Gaahleri | China | Full-time | Work Language: English *Full Stack Developer & UX Designer* *Aug 2025 – Present*

- **Responsibility:** Spearheaded the design and frontend development of seasonal campaign pages, translating high-fidelity Figma designs into responsive, high-performance interfaces.

- **Tech Stack:** Next.js, TypeScript, Prisma, PostgreSQL(Neon), Authentication(Clerk), Tailwind CSS, Shaden UI

➤ **Project: Kaledio Color Lab** *Sole Full-Stack Developer & UX Designer*

➤ **(Sole contributor · Demo video 5:40 · UI redesign in progress)**

- ✧ **Overview:** Spearheaded the 0-to-1 development of a full-stack color management ecosystem. Built an intelligent color recommendation engine using image recognition to help artists manage formulas.

- **UI/UX Design:** Executed full design lifecycle in Figma, including user research, competitor analysis, and flow mapping. Partnered with Marketing/R&D to transform technical color-mixing logic into seamless, cross-device user journeys.

- **Frontend:** Architected a type-safe interface using Next.js and TypeScript; implemented precision color extraction from user-uploaded images and built reusable components with Shaden UI to ensure codebase maintainability.

- **Backend:** Engineered a Prisma/PostgreSQL data layer with Clerk authentication; implemented user color lab and admin dashboard with BI tracking (most-saved/purchased colors) to drive data-driven insights for marketing and R&D.

➤ **Project: Aventus Brushes** *UI/UX Designer & Frontend Developer*

- ✧ **Overview:** Developed an e-commerce solution for high-ticket custom airbrushes, encompassing from UX design to the interactive purchasing website build.

- **UI/UX Design:** Designed a high-conversion, 5-stage customization flow (parts selection and real-time engraving preview). Reduced bounce rates by streamlining complex configurations into an intuitive, premium user interface.

- **Frontend :** Executed custom CSS injections and UI refactoring to ensure plugin functionality aligned perfectly with brand identity and cross-device responsiveness.

- **Key Impact:** Secured a successful 0-to-1 brand launch with \$362,302 total revenue in the first month.

➤ **Project: Website Rebranding** *UI/UX Designer & Frontend Developer*

- ✧ **Overview:** Led the rebranding of global storefronts, migrating legacy light UI to a high-end dark mode via custom CSS engineering.

- **UI/UX Design:** Spearheaded the transition from Light to Dark mode to enhance product prominence. Increased visual focus on CTAs and core product imagery by leveraging high-contrast ratios in a dark environment.

- **Frontend:** Architected a custom CSS framework to override legacy theme constraints, migrating the storefront from a generic light UI to a high-end dark mode.

ATG Entertainment | London | Full-time *Customer Experience Team Member* *Oct 2023 – Jul 2025*

- Directly supported patrons using English in London's major theater groups, gaining deep insights into the pain points of arts/theater/culture audiences.

- Collaborated within a 50-person team to manage 30+ daily international patron interactions, leveraging empathy to identify and document recurring pain points in the customer journey.

- Developed a strong "user-first" mindset, essential for building community-focused platforms.

EDUCATION BACKGROUND

University of People *Master of Information Technology* *Sep 2025-Present*

- **Core Courses:** Human-Computer Interaction, Algorithms, Software Engineering, Database Management, and Machine Learning.

- **Availability:** Available for full-time employment; flexible with work hours.

University College London *Master of Gender,Society and Representation(Merit)* *Sep 2022 - Sep 2023*

University of Jinan *Bachelor of History(Ranked 1st, GPA: 93.27/100)* *Sep 2017 - Jun 2021*

University of Jinan *Bachelor of Chinese Literature and Language(Distinction)* *Sep 2018 - Jun 2021*

- Applied humanities background to design inclusive, accessible interfaces and documentation, bridging technical requirements with empathetic storytelling for diverse audiences.
